1. GENERAL INFORMATION

Global Lounge was created with the purpose of gathering students from Colombia and all over the world to exchange their ideas and express their opinions on certain issues that are currently affecting people worldwide, such as migratory crises, overpopulation, social and economic inequality, and countless other topics of great international relevance.

By the creation of this commission, we look forward to offering students the opportunity of being part of our XVII Forum "Pensando en Colombia (PEC)", and share different perspectives or points of view, no matter where they are, to let our participants connect with each other through possible objective solutions.

1.1 WHICH IS THE ESTABLISHED LANGUAGE?

The established language for this online committee is **English** owing to the fact that this is an international dialect that most guests speak.

1.2 MODUS OPERANDI

The day will start off with the presentations students have prepared with previous anticipation about the topic of their choice. Thereby, one by one, each 15 to 20 minute presentation will be heard by the members of the launch who can clear doubts in the space opened up for questions once every speech finishes.

Furthermore, at various times throughout the day (between presentations or at the end of the day), we will engage in different activities related to the topics within our committee. This fosters a more enjoyable and welcoming environment, allowing us to break away from monotony and embrace diversity.
